

Student Chapter Continuation Program

1. Under the Student Chapter Continuation Program (SCCP), complimentary IEEE+EPS memberships will be provided for up to 6 student executive committee (exco) members per chapter provided they ensure that their student chapter remains viable for the following year. This includes the organization of at least two technical activities per calendar year, holding of annual elections and timely submission of required activity and financial reports every year. Annual election of the new exco should be held before end December. The newly-elected student chapter chair shall apply to the EPS Director of Student Programs for the SCCP by submitting before December 31, the names, email addresses and membership status of the 6 new exco members to be provided with complimentary memberships. Thereafter, students will receive instructions from EPS on how their complimentary memberships for the following year will be processed.
2. The student chapter faculty Advisor will also be provided with a complimentary IEEE+EPS eMembership where available, otherwise a regular membership will be provided, if he/she performs his/her duties satisfactorily and ensure the continued viability of the student chapter. The Advisor's duties include advising on student chapter activities, endorsing financial statements where necessary, ensuring that annual election of new student exco members are held before end December, and required reports are submitted by the student exco in a timely manner every year.
3. An evaluation on the performance of subsidized student exco members and Advisors will be conducted in January each year based on reports submitted. Non-performing students and Advisors will not be subsidized for another year. While Advisors may be subsidized every year, student exco members can only be subsidized a maximum of two times in order to encourage a healthy succession of student leaders in the chapter.
4. The above terms and conditions may be revised by EPS at any time.
5. The decision of the EPS Director of Student Programs with regard to the award of complimentary memberships shall be final and no correspondence and appeals shall be entertained.
